X Grade • Moradabad, Uttar Pradesh

04/2025

**PCM(80%)**

XII Grade • Moradabad, Uttar Pradesh

04/2022

---

## Certificates

1. AI Tools Workshop, 2. Python Fundamentals

---

## Personal Projects

1. Dice Game using ReactJS

Designed and developed an interactive dice game using React JS to showcase core frontend development skills. The application features a clean, responsive user interface and leverages React Hooks (useState, useEffect) for efficient state management and game logic control. Players can roll virtual dice, with the game dynamically updating scores and determining win conditions in real time.

2. Portfolio Website

- Built a responsive, single-page portfolio using React JS with component-based architecture.
- Showcased personal projects, skills, and achievements with clean layout and intuitive navigation.
- Implemented dynamic routing with react-router and form handling for contact submissions.
- Used React Hooks for stateful interactions and CSS for mobile-first responsive design.
